

# CARPENTRY TANKS

steel - stainless steel - aluminium

combi tank

The SMA Carpentry tanks are the result of experience in the industry that combines design and know-how constantly improving through time.

SMA offers its expertise to satisfy customers from design to manufacture of the tank, according to a philosophy of Tailor-Made-Tank that meets the highest requirements, and for this purpose has adopted a Quality Management System ISO 9001 certificate.

The attention to customer needs is also expressed through the implementation of a quality control program of each stage of the design and production.

The tanks are manufactured with thicknesses from 2.0 to 5.0 mm., in accordance with current regulations, 100% tested with leak test and singularly guaranteed.

At the end of the production process, all the tanks are cleaned and oiled inside.

Thanks to an effective internal flushing system, as well as to support its own laboratory, SMA is able to meet cleanliness standards set by ISO 4406 standards and SAE AS4059.

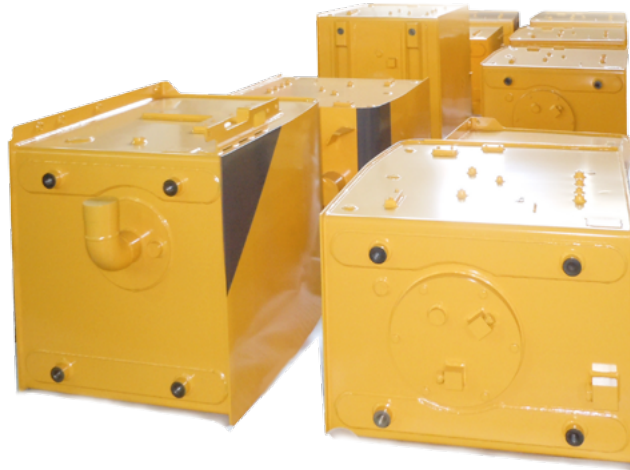

# EXPERIENCE, QUALITY and INNOVATION

service to Industry

Robotic welding machine

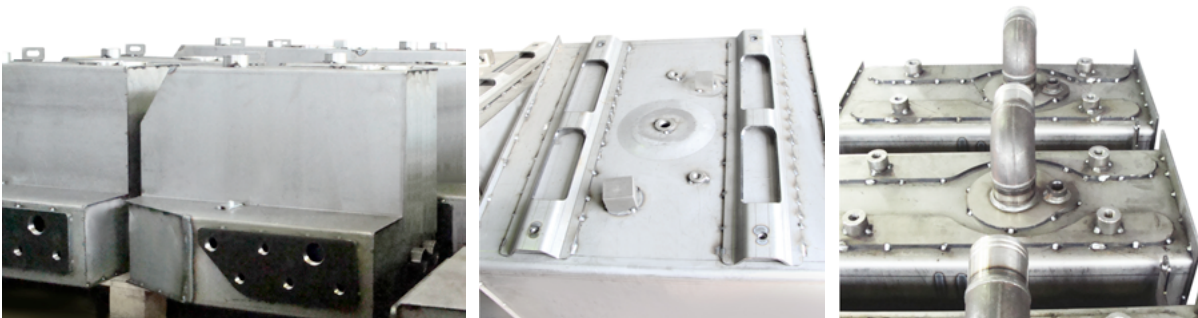

The level of specialization, has earned the partnership of the most important international companies in the construction equipment industry; they have chosen SMA for the reliability of the tanks that allow their vehicles to work in hard and extreme conditions but with safety and productivity.

Our robotic welding processes, certified according to EN standards, as well as optimize the timing and the way of performance, allow us to build a quality and appealing product at affordable and competitive price.

The various types of tanks can be completed with different components depending on the specific customer requirements. (Caps, bends, flanges, fittings, plates, etc.).

SMA also has a pre-assembly unit able to supply directly to the assembly lines of business customers, a finished product, ready to be installed and able to meet the quality standards and specifications of the most important European manufacturers of machines and industrial equipment.

Our company is qualified and used to operate in the supply system "Just in Time" to minimize the stock at client companies

Various types of processing
